

# Campbell

Campbell is a county in Wyoming with 4,697 residents age 65 or older. There are approximately 51 Native American residents age 55 or older. Compared to state average rates, older residents in Campbell County had significantly lower rates of graduate or professional degrees. They had higher rates of self-reported obesity. The most prevalent chronic conditions among people age 65+ in Campbell County are hypertension (45%), arthritis (33%), and high cholesterol (31%). Community resources to support healthy aging include 82% with a regular doctor, a hospital, 3 home health agencies, a nursing home, an adult day health center, a hospice agency, and a senior center.

<b>POPULATION CHARACTERISTICS</b>	<b>County rate is significantly different than State rate</b>	<b>COUNTY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		46,958	581,348
Population 60 years or older as % of total population		16.3%	23.3%
Total population 60 years or older		7,673	135,237
Population 65 years or older as % of total population		10.0%	16.4%
Total population 65 years or older		4,697	95,566
% 65-74 years		69.1%	61.2%
% 75-84 years		25.5%	28.3%

## HEALTHY AGING INDICATORS

ELDER INDEX: COST OF LIVING	RATIO OF COUNTY TO STATE	\$ COUNTY ESTIMATE	\$ STATE ESTIMATE
Single, homeowner without mortgage, good health	0.99	\$21,672	\$21,936
Single, renter, good health	1.04	\$26,064	\$25,032
Couple, homeowner without mortgage, good health	0.99	\$34,332	\$34,680
Couple, renter, good health	1.03	\$38,724	\$37,776

### TECHNICAL NOTES

*\*See our technical report for more detailed information on data sources, measures, and methodology. For most indicators the county and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and county estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between county and state estimates that we are confident are not due to chance. “Better” is used where a higher/lower value has positive implications for the health of older residents. “Worse” is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.*
