Jamestown (Newport)

Jamestown is a town in Newport County with 1,836 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of tooth loss, Alzheimer's disease or related dementias, anemia, asthma, chronic kidney disease, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, heart attack, hypertension, ischemic heart disease, liver disease, ischemic heart disease, high cholesterol, osteoarthritis/rheumatoid arthritis, osteoporosis, peripheral vascular disease, pressure ulcer, stroke, tobacco use disorder, depression, anxiety disorder and schizophrenia. However, they have a higher rate of cataract. They are more likely to take the health promotion steps of getting adequate sleep, engaging in physical activity, meeting the CDC guidelines for aerobic physical activity, receiving flu, pneumonia, and shingles vaccinations, and having annual dental exams. Community resources to support healthy aging include one public library, one senior center, and four primary care providers.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		5,554	1,094,250
Population 60 years or older as % of total population		43.0%	25.0%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Rhode Island Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.

Data Sources:

- Population Characteristics: The U.S. Census Bureau (American Community Survey (ACS)) 2018-2022;
 Rhode Island Department of Health (RIDOH) Behavioral Risk Factor Surveillance Survey (BRFSS), 2010-2022.
