

## Richmond (Washington)

Richmond is a town in Washington County with 1,134 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of anemia, benign prostatic hyperplasia, glaucoma, peripheral vascular disease, and anxiety disorder. However, they have a higher rate of PTSD. Community resources to support healthy aging include one public library, one senior center, and one home health agency.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		8,077	1,094,250
Population 60 years or older as % of total population		22.8%	25.0%
Total population 60 years and older		1,843	273,831
Population 65 years or older as % of total population		14.0%	17.9%
Total population 65 years and older		1,134	195,378
% 65-74 years		65.3%	57.8%
% 75-84 years		26.3%	29.0%
% 85 years or older		8.5%	13.2%
% 65+ population who are female		46.9%	56.3%
% 85+ population who are female		35.4%	67.8%
Race and ethnicity of the population 65+			
% White		100.0%	88.6%
% African American		0.0%	3.1%
% Asian		0.0%	1.8%

% 65+ getting Medicaid long term services and supports	*	1.9%	4.0%
% 65+ hospice users		3.4%	3.4%
% 65+ hospice users as % of decedents		51.7%	50.7%

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Rhode Island Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
