

Scituate (Providence)

Scituate is a town in Providence County with 2,401 residents aged 65 and older. Compared to state average rates, older residents have a lower rate of hip fracture. However, they have higher rates of glaucoma. They are more likely to take the health promotion step of having dental insurance, but less likely to receive the shingles vaccine. Community resources to support healthy aging include one senior center, one assisted living facility, one community health center, two public libraries, and four primary care providers.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		10,404	1,094,250
Population 60 years or older as % of total population		32.8%	25.0%

% 65+ hospice users as % of decedents		51.3%	50.7%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Rhode Island Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
