

## South Kingstown (Washington)

South Kingstown is a town in Washington County with 7,074 residents aged 65 and older. Compared to state average rates, older residents have lower rates of tooth loss, Alzheimer's disease, anemia, chronic kidney disease, COPD, CHF, diabetes, heart attack, hypertension, ischemic heart disease, liver disease, peripheral vascular disease, stroke, substance and tobacco use disorders, anxiety disorder, and schizophrenia. However, they have higher rates of benign prostatic hyperplasia, cataract, and osteoarthritis/rheumatoid arthritis. Older residents are more likely to get adequate sleep, engage in physical activity, meet the CDC guidelines for aerobic activity, receive flu shots, and have annual dental exams. In addition, they have a higher rate of excessive drinking. Community resources include 1 public university/community college, 1 adult day health center, 1 hospital, 1 home health agency, 1 senior center, 1 Osher Lifelong Learning Institute, 1 assisted living facilities, 1 Alzheimer's caregiver support group, 2 skilled nursing facilities, 2 community health centers, 3 public libraries, and 55 primary care providers.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate

% 65+ hospice users as % of decedents		55.0%	50.7%

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Rhode Island Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
