

## Warren (Bristol)

Warren is a town in Bristol County with 2,861 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of tooth loss and glaucoma. However, they have a higher rate of anxiety disorder. They are more likely to take the health promotion steps of getting adequate sleep, engaging in physical activity, meeting the CDC aerobic activity guidelines, having a regular doctor, and annual dental exams. Community resources to support healthy aging include one adult day health center, one public library, one senior center, one community health center, one assisted living facility, three skilled nursing facilities, and four primary care providers.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		11,117	1,094,250

% 65+ hospice users		3.5%	3.4%
% 65+ hospice users as % of decedents		59.8%	50.7%

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Rhode Island Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
