

# Kingston (Rockingham)

Kingston is a town located in southeastern New Hampshire and hosts the annual Kingston Days celebration. There are 998 residents age 65 or older. Compared to state average rates, older residents had lower rates of bipolar disorders, personality disorders, and cataracts. However, they had higher rates of lung cancer and migraines. Community resources to support healthy aging include 8 primary care providers within 5 miles, 9 home health agencies, a public library, and access to broadband.

<b>POPULATION CHARACTERISTICS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		6,099	1,327,503
Population 60 years or older as % of total population		24.3%	22.7%
Total population 60 years or older		1,481	301,630
Population 65 years or older as % of total population		16.4%	15.8%
Total population 65 years or older		998	210,385
% 65-74 years		68.0%	58.5%
% 75-84 years		23.7%	28.6%
% 85 years or older		8.2%	12.9%
Gender (65+ population)			
% female		44.5%	54.7%
Race/Ethnicity (65+ population)			
% White		95.0%	97.7%
% African American		0.0%	0.5%
% Asian		5.0%	0.9%
% Other		0.0%	0.9%
% Hispanic/Latino		0.0%	0.9%
Marital Status (65+ population)			
% married		55.1%	58.5%
% divorced/separated		10.8%	14.0%
% widowed		21.5%	22.9%
% never married		12.5%	4.6%
Education (65+ population)			
% with less than high school education		7.6%	12.3%
% with high school or some college		70.1%	57.1%
% with college degree		22.2%	30.6%
% of 65+ population living alone		19.2%	26.1%
% of 65+ population who speak only English at home		92.2%	91.3%
% of 65+ population who are veterans of military service		27.8%	24.8%
Age-sex adjusted 1-year mortality rate		4.3%	4.1%

<b>HEALTHY AGING INDICATORS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
<b>Geographic Migration (65+ population) in the past 12 months</b>			
% moved within same county		1.5%	3.6%
% moved from different county in New Hampshire		0.0%	1.0%
% moved from different state		0.0%	1.7%
<b>WELLNESS &amp; PREVENTION</b>			
% 60+ with any physical activity within last month		69.1%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		28.0%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		55.5%	58.6%
% 60+ met CDC guidelines for both types of physical activities		22.3%	19.9%
% 60+ getting recommended hours of sleep		66.4%	66.4%
% 60+ injured in a fall within last 12 months		8.9%	10.4%
% 65+ had hip fracture		2.7%	3.3%
% 60+ with self-reported fair or poor health status		20.4%	16.5%
% 60+ with 15+ physically unhealthy days last month		13.4%	12.5%
% 60+ with physical exam/check-up in past year		90.1%	86.5%
% 60+ met CDC preventive health screening goals		37.9%	40.3%
% 60+ flu shot past year		63.1%	59.3%
% 65+ with pneumonia vaccine		83.2%	77.8%
% 60+ with cholesterol screening		97.0%	95.3%
% 60+ women with a mammogram within last 2 years		78.6%	79.3%
% 60+ with colorectal cancer screening		75.3%	77.0%
% 60+ with HIV test		13.5%	13.5%

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "better" and "worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
