

## Bath (Grafton)

Bath is a rural town in Grafton County known for its historic architecture, including the notable Brick Store. There are 240 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of high cholesterol, anxiety and bipolar disorders, Alzheimer’s disease or related dementias, stroke, peripheral vascular disease, hypothyroidism, and visual impairment. Community resources to support healthy aging include 4 primary care providers within 5 miles, 2 home health agencies, a senior center, and a public library.

<b>POPULATION CHARACTERISTICS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		977	1,327,503
Population 60 years or older as % of total population		37.8%	22.7%
Total population 60 years or older		369	301,630
Population 65 years or older as % of total population		24.6%	15.8%
Total population 65 years or older		240	210,385
% 65-74 years		73.3%	58.5%
% 75-84 years		19.2%	28.6%
% 85 years or older		7.5%	12.9%
Gender (65+ population)			
% female		47.5%	54.7%
Race/Ethnicity (65+ population)			
% White		99.2%	97.7%
% African American		0.0%	0.5%
% Asian		0.0%	0.9%
% Other		0.8%	0.9%
% Hispanic/Latino		0.0%	0.9%
Marital Status (65+ population)			
% married		64.6%	58.5%
% divorced/separated		8.8%	14.0%
% widowed		20.4%	22.9%
% never married		6.3%	4.6%
Education (65+ population)			
% with less than high school education		8.3%	12.3%
% with high school or some college		62.9%	57.1%
% with college degree		28.8%	30.6%
% of 65+ population living alone		27.5%	26.1%
% of 65+ population who speak only English at home		98.8%	91.3%
% of 65+ population who are veterans of military service		21.7%	24.8%
Age-sex adjusted 1-year mortality rate		5.8%	4.1%

<b>HEALTHY AGING INDICATORS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
<b>Geographic Migration (65+ population) in the past 12 months</b>			
% moved within same county		0.0%	3.6%
% moved from different county in New Hampshire		0.0%	1.0%
% moved from different state		2.5%	1.7%
<b>WELLNESS &amp; PREVENTION</b>			
% 60+ with any physical activity within last month		73.6%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		23.8%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		55.3%	58.6%
% 60+ met CDC guidelines for both types of physical activities		17.3%	19.9%
% 60+ getting recommended hours of sleep		64.8%	66.4%
% 60+ injured in a fall within last 12 months		9.6%	10.4%
% 65+ had hip fracture		3.5%	3.3%

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "better" and "worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
