

Nottingham (Rockingham)

Nottingham is a town in Rockingham County and is home to Pawtuckaway State Park. There are 551 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of hip fracture, depression, anxiety disorders, Alzheimer’s disease or related dementias, stroke, hypertension, heart attack, ischemic heart disease, congestive heart failure, peripheral vascular disease, osteoporosis, hypothyroidism, anemia, chronic kidney disease, and cataract. Community resources to support healthy aging include 5 primary care providers within 5 miles, 6 home health agencies, a public library and access to broadband.

POPULATION CHARACTERISTICS	BETTER / WORSE STATE RATE¹	COMMUNITY ESTIMATE	STATE ESTIMATE
Total population all ages		4,901	1,327,503
Population 60 years or older as % of total population		19.0%	22.7%
Total population 60 years or older		932	301,630
Population 65 years or older as % of total population		11.2%	15.8%
Total population 65 years or older		551	210,385
% 65-74 years		63.2%	58.5%
% 75-84 years		26.0%	28.6%
% 85 years or older		10.9%	12.9%
Gender (65+ population)			
% female		53.9%	54.7%
Race/Ethnicity (65+ population)			
% White		98.5%	97.7%
% African American		0.0%	0.5%
% Asian		0.0%	0.9%
% Other		1.5%	0.9%
% Hispanic/Latino		2.9%	0.9%
Marital Status (65+ population)			
% married		61.7%	58.5%
% divorced/separated		18.1%	14.0%
% widowed		18.7%	22.9%
% never married		1.5%	4.6%
Education (65+ population)			
% with less than high school education		8.5%	12.3%
% with high school or some college		55.7%	57.1%
% with college degree		35.8%	30.6%
% of 65+ population living alone		14.2%	26.1%
% of 65+ population who speak only English at home		97.1%	91.3%
% of 65+ population who are veterans of military service		32.3%	24.8%
Age-sex adjusted 1-year mortality rate		3.9%	4.1%

HEALTHY AGING INDICATORS	BETTER / WORSE STATE RATE¹	COMMUNITY ESTIMATE	STATE ESTIMATE
Geographic Migration (65+ population) in the past 12 months			
% moved within same county		1.3%	3.6%
% moved from different county in New Hampshire		0.0%	1.0%
% moved from different state		6.2%	1.7%
WELLNESS & PREVENTION			
% 60+ with any physical activity within last month		69.1%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		28.0%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		55.5%	58.6%
% 60+ met CDC guidelines for both types of physical activities		22.3%	19.9%
% 60+ getting recommended hours of sleep		66.4%	66.4%
% 60+ injured in a fall within last 12 months		8.9%	10.4%
% 65+ had hip fracture	B	2.6%	3.3%
% 60+ with self-reported fair or poor health status		20.4%	16.5%
% 60+ with 15+ physically unhealthy days last month		13.4%	12.5%
% 60+ with physical exam/check-up in past year		90.1%	86.5%
% 60+ met CDC preventive health screening goals		37.9%	40.3%
% 60+ flu shot past year		63.1%	59.3%
% 65+ with pneumonia vaccine		83.2%	77.8%
% 60+ with cholesterol screening		97.0%	95.3%
% 60+ women with a mammogram within last 2 years		78.6%	79.3%
% 60+ with colorectal cancer screening		75.3%	77.0%
% 60+ with HIV test		13.5%	13.5%
% 60+ current smokers		12.1%	8.1%
Oral Health			
% 60+ with loss of 6 or more teeth		35.9%	29.0%

Elder Economic Security Standard Index			
Single, homeowner without mortgage, good health	\$25,536	\$25,284	1.01
Single, renter, good health	\$26,712	\$26,400	1.01
Couple, homeowner without mortgage, good health	\$37,092	\$37,128	1.00
Couple, renter, good health	\$38,268	\$38,244	1.00

TECHNICAL NOTES

*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "better" and "worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.

Data Sources:

- Population Characteristics: The U.S. Census Bureau (American Community Survey 2012-2016).
- Wellness & Prevention: The Behavioral Risk Factor Surveillance System (2011-2016).
- Nutrition/Diet: BRFSS (2011-2016), CMS (2014-2015), and the U.S. Department of Agriculture Food Atlas (2017).
- Behavioral Health: BRFSS (2011-2016), CMS (2014-2015), CDC Wonder website (2014-2016).
- Chronic Disease: The Master Beneficiary Summary File ABCD/Other from CMS (2014-2015).
- Disability: CMS (2014-2015) for the clinical measures, and ACS (2012-2016) for the self-reported disability.
- Access to Care: BRFSS (2011-2016), CMS (2015), Medicare.gov (June-July 2018), the NH Division of Public Health Services (2018), National Adult Day Services Association (2018), memorycaresdirectory.com (2018), and the Alzheimer's Association (July 2018).
- Service Utilization: CMS (2015), and Medicare Nursing Home Compare (December 2018).
- Community & Civic Engagement: AARP (2018 update; <https://www.aarp.org/livable-communities/network-age-friendly-communities/info-2014/member-list.html>), the Aging & Disability Resource Center, U.S. Environmental Protection Agency Air Compare (2016), assistedlivingfacilities.org, ACS (2012-2016), the NH Department of Business and Economic Affairs Division of Travel and Tourism Development (August 2018), NH YMCA (July 2018), the Federal Communications Commission (2016), BRFSS (2011-2016), and the NH Secretary of State.
- Safety & Transportation: U.S. Department of Justice Federal Bureau of Investigation (August 2017), the County Health Rankings (2018), BRFSS (2011-2016), ACS (2012-2016), and the National Highway Traffic Safety Administration (2011-2015).
- Economic & Housing, Cost of Living: ACS (2012-2016) and the Center for Social and Demographic Research on Aging at the University of Massachusetts Boston (August 2017).

Healthy Aging Data Report Team. Many people contributed to this research. The 2018 research team: Beth Dugan PhD, Frank Porell PhD, Nina Silverstein PhD, Chae Man Lee PhD, ShuangShuang Wang PhD, Bon Kim, Natalie Pithecoff, Haowei Wang, Sae Hwang Han, Richard Chunga, & Shiva Prasad from the Gerontology Institute in the McCormack Graduate School of Policy and Global Studies at the University of Massachusetts Boston. The Tufts Health Plan Foundation supported the research and provided important guidance. Our Advisory Committees helped to make the Data Report best address the needs of New Hampshire. We thank JSI for their continued partnership. Questions? Beth.dugan@umb.edu
