

## Willington (Tolland)

Willington is a town in Tolland County with 755 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of hip fracture, high cholesterol, Alzheimer's disease or related dementias, anemia, benign prostatic hyperplasia, diabetes, fibromyalgia/chronic pain/fatigue, hypothyroidism, osteoarthritis or rheumatoid arthritis, osteoporosis, peripheral vascular disease, pressure ulcers, prostate cancer, stroke, traumatic brain injury, opioid use disorder, depression, bipolar disorder, schizophrenia, and hearing, visual, and mobility impairments. However, they had higher rates of cataract, ischemic heart disease, and tobacco use disorder. They are less likely to be stressed about paying rent or mortgage in the last month. Community resources to support healthy aging include 11 home health agencies, a senior center, and a public library.

<b>POPULATION CHARACTERISTICS</b>	<b>Significantly different than STATE RATE</b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		5,912	3,581,504

Couple, homeowner without mortgage, good health	0.94	\$35,520.00	\$37,920.00
Couple, renter, good health	0.95	\$37,656.00	\$39,660.00

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org>) for more information on data sources, measures, geographic units, margins of error, and statistical methodology. For most indicators the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*.

We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.
