

Cromwell (Middlesex)

Cromwell is a town in Middlesex County with 2,526 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of obesity, asthma, COPD, diabetes, and ischemic heart disease. However, they had higher rates of hip fracture, Alzheimer's disease or related dementias, cataract, anxiety disorder, and schizophrenia and other psychotic disorders. They are more likely to take the health promotion steps of having an annual physical exam, a regular doctor, getting a shingles vaccine, and a cholesterol screening. Community resources to support healthy aging include 215 primary care providers, a hospital, and 9 nursing homes within 5 miles; 28 home health agencies, 9 hospice agencies, an assisted living site, a senior center, a university or community college, and a public library.

Couple, renter, good health	0.99	\$39,096.00	\$39,660.00

TECHNICAL NOTES

*See our technical report (online at <https://healthyagingdatareports.org>) for more information on data sources, measures, geographic units, margins of error, and statistical methodology. For most indicators the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *.

We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.
