

East Hartford (Hartford)

East Hartford is a town in Hartford County with 7,105 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of benign prostatic hyperplasia, fibromyalgia/chronic pain/fatigue, glaucoma, hypothyroidism, leukemias and lymphomas, osteoarthritis/rheumatoid arthritis, osteoporosis, prostate cancer, and hearing impairment. However, they had higher rates of asthma, obesity, tooth loss, chronic kidney disease, COPD, colon cancer, congestive heart failure, diabetes, hypertension, ischemic heart disease, peripheral vascular disease, tobacco use disorder, depression, and visual and mobility impairments. Community resources to support healthy aging include 198 primary care providers, a hospital, and 6 nursing homes within 5 miles; 31 home health agencies, 6 community health centers, an adult day health center, 10 hospice agencies, 3 caregiver support groups, a university or community college, 2 public libraries, and 2 senior centers.

POPULATION CHARACTERISTICS	Significantly different than STATE RATE	COMMUNITY ESTIMATE	STATE ESTIMATE
Total population all ages		50,453	3,581,504

Couple, renter, good health	0.95	\$37,812.00	\$39,660.00

TECHNICAL NOTES

*See our technical report (online at <https://healthyagingdatareports.org>) for more information on data sources, measures, geographic units, margins of error, and statistical methodology. For most indicators the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *.

We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.
