

Goshen

Goshen is a county in Wyoming with 2,923 residents age 65 or older. There are approximately 18 Native American residents age 55 or older. Compared to state average rates, older residents in Goshen County had significantly lower rates of being injured in a fall. The most prevalent chronic conditions among people age 65+ in Goshen County are hypertension (42%), arthritis (26%), and ischemic heart disease (23%). They are more likely to have older women who took mammograms within the past two years but less likely for all older residents to have taken the health promotion step of doing any physical activity within the last month. Community resources to support healthy aging include 83% with a regular doctor, a hospital, a nursing home, and a senior center.

POPULATION CHARACTERISTICS	County rate is significantly different than State rate	COUNTY ESTIMATE	STATE ESTIMATE
Total population all ages		13,301	581,348
Population 60 years or older as % of total population		30.1%	23.3%
Total population 60 years or older		3,999	135,237
Population 65 years or older as % of total population		22.0%	16.4%
Total population 65 years or older		2,923	95,566
% 65-74 years		55.1%	61.2%
% 75-84 years		33.8%	28.3%
% 85 years or older		11.1%	10.5%
% 65+ population who are female		51.8%	51.7%
% 85+ population who are female		68.5%	60.2%
Race and ethnicity of the population 65+			
% White		98.4%	95.6%
% African American		0.0%	0.3%

Couple, renter, good health	0.97	\$36,600	\$37,776

TECHNICAL NOTES

**See our technical report for more detailed information on data sources, measures, and methodology. For most indicators the county and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and county estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between county and state estimates that we are confident are not due to chance. “Better” is used where a higher/lower value has positive implications for the health of older residents. “Worse” is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.*
