

## Haverhill (Grafton)

Haverhill is a rural town in western New Hampshire that includes the historic town center at Haverhill Corner. There are 932 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of high cholesterol, bipolar disorders, benign prostatic hyperplasia, and visual impairment. However, they had higher rates of hypertension and heart attack. Community resources to support healthy aging include a primary care provider within 5 miles, an assisted living site, a community health center, 3 home health agencies, and 4 public libraries.

<b>POPULATION CHARACTERISTICS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		4,617	1,327,503
Population 60 years or older as % of total population		25.3%	22.7%
Total population 60 years or older		1,168	301,630
Population 65 years or older as % of total population		20.2%	15.8%
Total population 65 years or older		932	210,385
% 65-74 years		48.7%	58.5%
% 75-84 years		33.7%	28.6%
% 85 years or older		17.6%	12.9%
Gender (65+ population)			
% female		57.1%	54.7%
Race/Ethnicity (65+ population)			
% White		99.4%	97.7%
% African American		0.0%	0.5%
% Asian		0.0%	0.9%
% Other		0.6%	0.9%
% Hispanic/Latino		1.9%	0.9%
Marital Status (65+ population)			
% married		43.7%	58.5%
% divorced/separated		17.9%	14.0%
% widowed		31.0%	22.9%
% never married		7.4%	4.6%
Education (65+ population)			
% with less than high school education		20.5%	12.3%
% with high school or some college		64.3%	57.1%
% with college degree		15.2%	30.6%
% of 65+ population living alone		27.7%	26.1%
% of 65+ population who speak only English at home		95.1%	91.3%
% of 65+ population who are veterans of military service		18.8%	24.8%
Age-sex adjusted 1-year mortality rate		5.1%	4.1%

<b>HEALTHY AGING INDICATORS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
<b>Geographic Migration (65+ population) in the past 12 months</b>			
% moved within same county		4.0%	3.6%
% moved from different county in New Hampshire		3.0%	1.0%
% moved from different state		2.9%	1.7%
<b>WELLNESS &amp; PREVENTION</b>			
% 60+ with any physical activity within last month		73.6%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		23.8%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		55.3%	58.6%
% 60+ met CDC guidelines for both types of physical activities		17.3%	19.9%
% 60+ getting recommended hours of sleep		64.8%	66.4%
% 60+ injured in a fall within last 12 months		9.6%	10.4%
% 65+ had hip fracture		3.5%	3.3%
% 60+ with self-reported fair or poor health status		18.0%	16.5%
% 60+ with 15+ physically unhealthy days last month		16.6%	12.5%
% 60+ with physical exam/check-up in past year		83.2%	86.5%
% 60+ met CDC preventive health screening goals		38.2%	40.3%
% 60+ flu shot past year		52.1%	59.3%
% 65+ with pneumonia vaccine		74.9%	77.8%
% 60+ with cholesterol screening		92.9%	95.3%
% 60+ women with a mammogram within last 2 years		77.0%	79.3%
% 60+ with colorectal cancer screening		80.9%	77.0%
% 60+ with HIV test		16.2%	13.5%
% 60+ current smokers		10.6%	8.1%
<b>Oral Health</b>			
% 60+ with loss of 6 or more teeth		33.6%	29.0%

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “better” and “worse” to highlight differences between community and state estimates that we are confident are not due to chance. “Better” is used where a higher/lower value has positive implications for the health of older residents. “Worse” is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
