

New Castle (Rockingham)

New Castle is a town in eastern New Hampshire and the only town in the state situated entirely on islands. There are 364 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of obesity, anxiety disorders, post-traumatic stress disorder, schizophrenia and other psychotic disorders, personality disorders, tobacco use disorders, diabetes, chronic obstructive pulmonary disease, asthma, congestive heart failure, peripheral vascular disease, chronic kidney disease, and epilepsy. However, they had higher rates of excessive drinking. They are more likely to take the health promotion steps of meeting the CDC guidelines for muscle-strengthening and aerobic physical activity (relative to the state estimate) and getting screened for colorectal cancer. Community resources to support healthy aging include 65 primary care providers, a hospital, and 3 nursing homes within 5 miles, 8 home health agencies, a public library, and access to broadband.

POPULATION CHARACTERISTICS	BETTER / WORSE STATE RATE¹	COMMUNITY ESTIMATE	STATE ESTIMATE
Total population all ages		935	1,327,503
Population 60 years or older as % of total population		48.7%	22.7%
Total population 60 years or older		455	301,630
Population 65 years or older as % of total population		38.9%	15.8%
Total population 65 years or older		364	210,385
% 65-74 years		53.3%	58.5%
% 75-84 years		23.6%	28.6%
% 85 years or older		23.1%	12.9%
Gender (65+ population)			
% female		55.8%	54.7%
Race/Ethnicity (65+ population)			
% White		97.8%	97.7%
% African American		0.0%	0.5%
% Asian		0.8%	0.9%
% Other		1.4%	0.9%
% Hispanic/Latino		0.0%	0.9%
Marital Status (65+ population)			
% married		73.1%	58.5%
% divorced/separated		5.8%	14.0%
% widowed		18.4%	22.9%
% never married		2.7%	4.6%
Education (65+ population)			
% with less than high school education		0.0%	12.3%
% with high school or some college		36.8%	57.1%
% with college degree		63.2%	30.6%
% of 65+ population living alone		19.0%	26.1%
% of 65+ population who speak only English at home		96.2%	91.3%
% of 65+ population who are veterans of military service		31.3%	24.8%
Age-sex adjusted 1-year mortality rate		4.7%	4.1%

HEALTHY AGING INDICATORS	BETTER / WORSE STATE RATE¹	COMMUNITY ESTIMATE	STATE ESTIMATE
Geographic Migration (65+ population) in the past 12 months			
% moved within same county		3.0%	3.6%
% moved from different county in New Hampshire		0.0%	1.0%
% moved from different state		0.8%	1.7%
WELLNESS & PREVENTION			
% 60+ with any physical activity within last month		81.4%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity	B	35.7%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		66.6%	58.6%
% 60+ met CDC guidelines for both types of physical activities	B	29.8%	19.9%
% 60+ getting recommended hours of sleep		72.7%	66.4%
% 60+ injured in a fall within last 12 months		10.4%	10.4%
% 65+ had hip fracture		3.3%	3.3%
% 60+ with self-reported fair or poor health status		16.1%	16.5%
% 60+ with 15+ physically unhealthy days last month		10.4%	12.5%
% 60+ with physical exam/check-up in past year		88.8%	86.5%
% 60+ met CDC preventive health screening goals		40.6%	40.3%
% 60+ flu shot past year		57.9%	59.3%
% 65+ with pneumonia vaccine		78.2%	77.8%
% 60+ with cholesterol screening		97.3%	95.3%
% 60+ women with a mammogram within last 2 years		85.6%	79.3%
% 60+ with colorectal cancer screening	B	84.7%	77.0%
% 60+ with HIV test		14.9%	13.5%
% 60+ current smokers		7.3%	8.1%
Oral Health

Elder Economic Security Standard Index			
Single, homeowner without mortgage, good health	\$25,536	\$25,284	1.01
Single, renter, good health	\$26,712	\$26,400	1.01
Couple, homeowner without mortgage, good health	\$37,092	\$37,128	1.00
Couple, renter, good health	\$38,268	\$38,244	1.00

TECHNICAL NOTES

*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “better” and “worse” to highlight differences between community and state estimates that we are confident are not due to chance. “Better” is used where a higher/lower value has positive implications for the health of older residents. “Worse” is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
