

New London (Merrimack)

New London is a town located in Merrimack County and is home to Colby-Sawyer College. There are 1,532 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of obesity, depression, anxiety disorders, post-traumatic stress disorder, schizophrenia and other psychotic disorders, tobacco use disorders, Alzheimer’s disease or related dementias, diabetes, asthma, congestive heart failure, lung cancer, chronic kidney disease, and fibromyalgia/chronic pain/fatigue, and mobility impairments. However, they had higher rates of osteoarthritis/rheumatoid arthritis, osteoporosis, leukemias and lymphomas, prostate cancer, benign prostatic hyperplasia, hypothyroidism, glaucoma, and cataracts. Community resources to support healthy aging include 21 primary care providers and a hospital within 5 miles, 2 home health agencies, a senior center, an adult day center, an assisted living site, a university or community college, a public library, and access to broadband.

POPULATION CHARACTERISTICS	BETTER / WORSE STATE RATE¹	COMMUNITY ESTIMATE	STATE ESTIMATE
Total population all ages		4,594	1,327,503
Population 60 years or older as % of total population		36.7%	22.7%
Total population 60 years or older		1,688	301,630
Population 65 years or older as % of total population		33.3%	15.8%
Total population 65 years or older		1,532	210,385
% 65-74 years		40.0%	58.5%
% 75-84 years		33.6%	28.6%
% 85 years or older		26.4%	12.9%
Gender (65+ population)			
% female		56.1%	54.7%
Race/Ethnicity (65+ population)			
% White		99.7%	97.7%
% African American		0.0%	0.5%
% Asian		0.0%	0.9%
% Other		0.3%	0.9%
% Hispanic/Latino		0.0%	0.9%
Marital Status (65+ population)			
% married		58.9%	58.5%
% divorced/separated		12.8%	14.0%
% widowed		25.7%	22.9%
% never married		2.6%	4.6%
Education (65+ population)			
% with less than high school education		4.0%	12.3%
% with high school or some college		33.4%	57.1%
% with college degree		62.7%	30.6%
% of 65+ population living alone		33.3%	26.1%
% of 65+ population who speak only English at home		95.3%	91.3%
% of 65+ population who are veterans of military service		27.3%	24.8%
Age-sex adjusted 1-year mortality rate	B	2.7%	4.1%

HEALTHY AGING INDICATORS	BETTER / WORSE STATE RATE¹	COMMUNITY ESTIMATE	STATE ESTIMATE
Geographic Migration (65+ population) in the past 12 months			
% moved within same county		5.1%	3.6%
% moved from different county in New Hampshire		1.1%	1.0%
% moved from different state		0.3%	1.7%
WELLNESS & PREVENTION			
% 60+ with any physical activity within last month		71.7%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		26.4%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		59.6%	58.6%
% 60+ met CDC guidelines for both types of physical activities		20.1%	19.9%
% 60+ getting recommended hours of sleep		70.6%	66.4%
% 60+ injured in a fall within last 12 months		11.2%	10.4%
% 65+ had hip fracture		4.0%	3.3%
% 60+ with self-reported fair or poor health status		18.1%	16.5%
% 60+ with 15+ physically unhealthy days last month		13.5%	12.5%
% 60+ with physical exam/check-up in past year		84.8%	86.5%
% 60+ met CDC preventive health screening goals		40.7%	40.3%
% 60+ flu shot past year		60.6%	59.3%
% 65+ with pneumonia vaccine		78.0%	77.8%
% 60+ with cholesterol screening		94.1%	95.3%
% 60+ women with a mammogram within last 2 years		76.7%	79.3%
% 60+ with colorectal cancer screening		73.1%	77.0%
% 60+ with HIV test		13.1%	13.5%
% 60+ current smokers		7.4%	8.1%
Oral Health

ECONOMIC & HOUSING VARIABLES			
% 65+ with income below the poverty line past year		0.9%	5.4%
% 60+ receiving food stamps past year		3.2%	5.7%
% 65+ employed past year		25.3%	24.8%
Household income (65+ householder)			
% households with annual income < \$20,000		11.2%	18.2%
% households with annual income \$20,000-\$49,999		30.9%	36.5%
% households with annual income > \$50,000		57.9%	45.3%
% 60+ own home		79.7%	79.9%
% 60+ have mortgage on home		24.4%	35.3%
% 65+ households spend >35% of income on housing (renter)		3.6%	8.7%
% 65+ households spend >35% of income on housing (owner)		25.0%	21.2%
COST OF LIVING	\$ COUNTY ESTIMATE	\$ STATE ESTIMATE	RATIO (COUNTY/STATE)
Elder Economic Security Standard Index			
Single, homeowner without mortgage, good health	\$25,860	\$25,284	1.02
Single, renter, good health	\$26,376	\$26,400	1.00
Couple, homeowner without mortgage, good health	\$37,800	\$37,128	1.02
Couple, renter, good health	\$38,316	\$38,244	1.00

TECHNICAL NOTES

*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “better” and “worse” to highlight differences between community and state estimates that we are confident are not due to chance. “Better” is used where a higher/lower value has positive implications for the health of older residents. “Worse” is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
