

## Pembroke (Merrimack)

Pembroke is an urban town located in Merrimack County adjacent to Concord and Bear Brook State Park. There are 943 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of Alzheimer’s disease or related dementias, anemia, cataracts, and hearing impairment. However, they had higher rates of obesity, anxiety disorders, tobacco use disorders, and hypertension. Community resources to support healthy aging include 20 primary care providers within 5 miles, 4 home health agencies, a public library, and access to broadband.

<b>POPULATION CHARACTERISTICS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		7,116	1,327,503
Population 60 years or older as % of total population		20.7%	22.7%
Total population 60 years or older		1,471	301,630
Population 65 years or older as % of total population		13.3%	15.8%
Total population 65 years or older		943	210,385
% 65-74 years		58.0%	58.5%
% 75-84 years		26.4%	28.6%
% 85 years or older		15.6%	12.9%
Gender (65+ population)			
% female		54.8%	54.7%
Race/Ethnicity (65+ population)			
% White		97.8%	97.7%
% African American		0.0%	0.5%
% Asian		0.0%	0.9%
% Other		2.2%	0.9%
% Hispanic/Latino		2.2%	0.9%
Marital Status (65+ population)			
% married		50.7%	58.5%
% divorced/separated		15.5%	14.0%
% widowed		32.1%	22.9%
% never married		1.7%	4.6%
Education (65+ population)			
% with less than high school education		13.5%	12.3%
% with high school or some college		63.6%	57.1%
% with college degree		22.9%	30.6%
% of 65+ population living alone		20.9%	26.1%
% of 65+ population who speak only English at home		89.6%	91.3%
% of 65+ population who are veterans of military service		22.0%	24.8%
Age-sex adjusted 1-year mortality rate		5.3%	4.1%

<b>HEALTHY AGING INDICATORS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
<b>Geographic Migration (65+ population) in the past 12 months</b>			
% moved within same county		3.7%	3.6%
% moved from different county in New Hampshire		0.0%	1.0%
% moved from different state		6.0%	1.7%
<b>WELLNESS &amp; PREVENTION</b>			
% 60+ with any physical activity within last month		70.2%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		24.4%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		56.3%	58.6%
% 60+ met CDC guidelines for both types of physical activities		17.7%	19.9%
% 60+ getting recommended hours of sleep		67.2%	66.4%
% 60+ injured in a fall within last 12 months		7.6%	10.4%
% 65+ had hip fracture		3.8%	3.3%
% 60+ with self-reported fair or poor health status		14.8%	16.5%
% 60+ with 15+ physically unhealthy days last month		10.8%	12.5%
% 60+ with physical exam/check-up in past year		82.3%	86.5%
% 60+ met CDC preventive health screening goals		38.0%	40.3%
% 60+ flu shot past year		54.2%	59.3%
% 65+ with pneumonia vaccine		78.7%	77.8%
% 60+ with cholesterol screening		92.5%	95.3%
% 60+ women with a mammogram within last 2 years		76.9%	79.3%
% 60+ with colorectal cancer screening		82.2%	77.0%
% 60+ with HIV test		10.1%	13.5%
% 60+ current smokers		7.6%	8.1%
<b>Oral Health</b>

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “better” and “worse” to highlight differences between community and state estimates that we are confident are not due to chance. “Better” is used where a higher/lower value has positive implications for the health of older residents. “Worse” is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
