

## Bedford (Hillsborough)

Bedford is an urban town and suburb of Manchester, located in Hillsborough County. There are 3,390 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of tooth loss, obesity, tobacco use disorders, diabetes, and chronic obstructive pulmonary disease. However, they had higher rates of hip fracture, high cholesterol, anxiety and bipolar disorders, schizophrenia and other psychotic disorders, Alzheimer’s disease or related dementias, stroke asthma, osteoarthritis/rheumatoid arthritis, osteoporosis, prostate cancer, benign prostatic hyperplasia, hypothyroidism, anemia, and glaucoma. Community resources to support healthy aging include a hospital and 3 nursing homes within 5 miles, 10 home health agencies, a memory cafe, a dementia support group, 3 assisted living sites, and a public library.

<b>POPULATION CHARACTERISTICS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		21,879	1,327,503
Population 60 years or older as % of total population		23.1%	22.7%
Total population 60 years or older		5,047	301,630
Population 65 years or older as % of total population		15.5%	15.8%
Total population 65 years or older		3,390	210,385
% 65-74 years		52.8%	58.5%
% 75-84 years		27.9%	28.6%
% 85 years or older		19.3%	12.9%
Gender (65+ population)			
% female		57.6%	54.7%
Race/Ethnicity (65+ population)			
% White		96.7%	97.7%
% African American		0.0%	0.5%
% Asian		3.2%	0.9%
% Other		0.1%	0.9%
% Hispanic/Latino		0.0%	0.9%
Marital Status (65+ population)			
% married		57.1%	58.5%
% divorced/separated		9.0%	14.0%
% widowed		31.5%	22.9%
% never married		2.4%	4.6%
Education (65+ population)			
% with less than high school education		11.0%	12.3%
% with high school or some college		48.2%	57.1%
% with college degree		40.8%	30.6%
% of 65+ population living alone		26.2%	26.1%
% of 65+ population who speak only English at home		89.9%	91.3%
% of 65+ population who are veterans of military service		19.6%	24.8%
Age-sex adjusted 1-year mortality rate		4.2%	4.1%

<b>HEALTHY AGING INDICATORS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
<b>Geographic Migration (65+ population) in the past 12 months</b>			
% moved within same county		6.7%	3.6%
% moved from different county in New Hampshire		0.8%	1.0%
% moved from different state		1.2%	1.7%
<b>WELLNESS &amp; PREVENTION</b>			
% 60+ with any physical activity within last month		72.8%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		21.3%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		58.6%	58.6%
% 60+ met CDC guidelines for both types of physical activities		16.9%	19.9%
% 60+ getting recommended hours of sleep		66.9%	66.4%
% 60+ injured in a fall within last 12 months		7.6%	10.4%
% 65+ had hip fracture	W	4.3%	3.3%
% 60+ with self-reported fair or poor health status		14.5%	16.5%

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “better” and “worse” to highlight differences between community and state estimates that we are confident are not due to chance. “Better” is used where a higher/lower value has positive implications for the health of older residents. “Worse” is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
