

## Warner (Merrimack)

Warner is a town in Merrimack County that is home to Mount Kearsarge State Forest. There are 499 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of anxiety disorders, schizophrenia and other psychotic disorders, Alzheimer’s disease or related dementias, diabetes, stroke, hypertension, ischemic heart disease, congestive heart failure, peripheral vascular disease, lung cancer, anemia, chronic kidney disease, liver diseases, pressure ulcers, and hearing impairments. Community resources to support healthy aging include 4 primary care providers within 5 miles, 3 home health agencies, a memory café, an assisted living site, a university or community college, a public library, and access to broadband.

<b>POPULATION CHARACTERISTICS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		2,857	1,327,503
Population 60 years or older as % of total population		27.7%	22.7%
Total population 60 years or older		792	301,630
Population 65 years or older as % of total population		17.5%	15.8%
Total population 65 years or older		499	210,385
% 65-74 years		66.3%	58.5%
% 75-84 years		26.3%	28.6%
% 85 years or older		7.4%	12.9%
Gender (65+ population)			
% female		49.1%	54.7%
Race/Ethnicity (65+ population)			
% White		98.8%	97.7%
% African American		0.0%	0.5%
% Asian		0.0%	0.9%
% Other		1.2%	0.9%
% Hispanic/Latino		0.0%	0.9%
Marital Status (65+ population)			
% married		60.7%	58.5%
% divorced/separated		18.8%	14.0%
% widowed		16.4%	22.9%
% never married		4.0%	4.6%
Education (65+ population)			
% with less than high school education		10.0%	12.3%
% with high school or some college		50.7%	57.1%
% with college degree		39.3%	30.6%
% of 65+ population living alone		15.5%	26.1%
% of 65+ population who speak only English at home		99.0%	91.3%
% of 65+ population who are veterans of military service		20.6%	24.8%
Age-sex adjusted 1-year mortality rate		3.3%	4.1%

<b>HEALTHY AGING INDICATORS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
<b>Geographic Migration (65+ population) in the past 12 months</b>			
% moved within same county		2.2%	3.6%
% moved from different county in New Hampshire		2.2%	1.0%
% moved from different state		0.4%	1.7%
<b>WELLNESS &amp; PREVENTION</b>			
% 60+ with any physical activity within last month		74.2%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		23.1%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		61.5%	58.6%
% 60+ met CDC guidelines for both types of physical activities		17.7%	19.9%
% 60+ getting recommended hours of sleep		66.8%	66.4%
% 60+ injured in a fall within last 12 months		7.1%	10.4%
% 65+ had hip fracture		2.6%	3.3%
% 60+ with self-reported fair or poor health status		15.4%	16.5%
% 60+ with 15+ physically unhealthy days last month		10.7%	12.5%
% 60+ with physical exam/check-up in past year		84.8%	86.5%
% 60+ met CDC preventive health screening goals		35.3%	40.3%
% 60+ flu shot past year		58.9%	59.3%
% 65+ with pneumonia vaccine		73.7%	77.8%
% 60+ with cholesterol screening		92.1%	95.3%
% 60+ women with a mammogram within last 2 years		84.1%	79.3%
% 60+ with colorectal cancer screening		78.7%	77.0%
% 60+ with HIV test		17.4%	13.5%
% 60+ current smokers		8.3%	8.1%
<b>Oral Health</b>			
% 60+ with loss of 6 or more teeth		24.0%	29.0%

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "better" and "worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
