

## Woodstock (Grafton)

Woodstock is a rural town in Grafton County that is home to the Hubbard Brook Experimental Forest. There are 140 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of high cholesterol, depression, anxiety and bipolar disorders, schizophrenia and other psychotic disorders, chronic kidney disease, liver diseases, fibromyalgia/chronic pain/fatigue, migraines, epilepsy, and hearing, visual, and mobility impairments. Community resources to support healthy aging include 2 home health agencies, a senior center, and a public library.

<b>POPULATION CHARACTERISTICS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		1,004	1,327,503
Population 60 years or older as % of total population		22.7%	22.7%
Total population 60 years or older		228	301,630
Population 65 years or older as % of total population		13.9%	15.8%
Total population 65 years or older		140	210,385
% 65-74 years		49.3%	58.5%
% 75-84 years		50.7%	28.6%
% 85 years or older		0.0%	12.9%
Gender (65+ population)			
% female		42.1%	54.7%
Race/Ethnicity (65+ population)			
% White		92.1%	97.7%
% African American		0.0%	0.5%
% Asian		0.0%	0.9%
% Other		7.9%	0.9%
% Hispanic/Latino		0.0%	0.9%
Marital Status (65+ population)			
% married		72.9%	58.5%
% divorced/separated		6.4%	14.0%
% widowed		20.7%	22.9%
% never married		0.0%	4.6%
Education (65+ population)			
% with less than high school education		11.4%	12.3%
% with high school or some college		48.6%	57.1%
% with college degree		40.0%	30.6%
% of 65+ population living alone		24.3%	26.1%
% of 65+ population who speak only English at home		97.9%	91.3%
% of 65+ population who are veterans of military service		22.9%	24.8%
Age-sex adjusted 1-year mortality rate	B	2.2%	4.1%

<b>HEALTHY AGING INDICATORS</b>	<b>BETTER / WORSE STATE RATE<sup>1</sup></b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
<b>Geographic Migration (65+ population) in the past 12 months</b>			
% moved within same county		2.9%	3.6%
% moved from different county in New Hampshire		0.0%	1.0%
% moved from different state		0.0%	1.7%
<b>WELLNESS &amp; PREVENTION</b>			
% 60+ with any physical activity within last month		77.5%	74.5%
% 60+ met CDC guidelines for muscle-strengthening activity		30.4%	26.0%
% 60+ met CDC guidelines for aerobic physical activity		61.7%	58.6%
% 60+ met CDC guidelines for both types of physical activities		24.3%	19.9%
% 60+ getting recommended hours of sleep		68.7%	66.4%
% 60+ injured in a fall within last 12 months		8.2%	10.4%
% 65+ had hip fracture		2.7%	3.3%
% 60+ with self-reported fair or poor health status		13.3%	16.5%
% 60+ with 15+ physically unhealthy days last month		14.1%	12.5%
% 60+ with physical exam/check-up in past year		83.2%	86.5%
% 60+ met CDC preventive health screening goals		38.5%	40.3%
% 60+ flu shot past year		60.9%	59.3%
% 65+ with pneumonia vaccine		83.7%	77.8%
% 60+ with cholesterol screening		93.9%	95.3%
% 60+ women with a mammogram within last 2 years		79.2%	79.3%
% 60+ with colorectal cancer screening		69.9%	77.0%
% 60+ with HIV test		18.1%	13.5%
% 60+ current smokers		8.8%	8.1%
<b>Oral Health</b>

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org/>) for more information on data sources, measures, methodology, and margin of errors. For most indicators the reported community and state values are both estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "better" and "worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting. When possible we report estimates for 244 geographic units (i.e., every NH city/town and 5 Manchester neighborhoods, 4 Nashua neighborhoods). For example, the population characteristics were reported for all 244 units. For other data (i.e., highly prevalent chronic disease, health services utilization) we could report for 154 geographic units. For less prevalent conditions we report for 69 geographic units. For the BRFSS data we report for 28 geographic units, and for the lowest prevalence conditions (e.g., HIV) we report for 4 geographic units. The same estimate is reported for all cities/towns within aggregated geographic areas. Maps of the different geographic groupings and the rationale behind the groupings are in the Technical Report.
