

## Jamestown (Newport)

Jamestown is a town in Newport County with 1,314 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of obesity, high cholesterol, tooth loss, Alzheimer's disease, anemia, asthma, benign prostatic hyperplasia, chronic kidney disease, COPD, CHF, diabetes, epilepsy, heart attack, hypertension, hypothyroidism, ischemic heart disease, arthritis, osteoporosis, peripheral vascular disease, stroke, tobacco use disorder, depression, anxiety and bipolar disorders, schizophrenia, vision and ambulatory difficulty. However, they had a higher rate of migraine. They are more likely to take the health promotion steps of doing physical activity and getting a shingles vaccine and less likely to have an annual physical exam. Community resources include 85 primary care providers, a hospital, and a nursing home within 5 miles; an Alzheimer's disease support group, 14 home health agencies, 6 hospice agencies, a senior center, and a public library.

POPULATION CHARACTERISTICS	Significantly different than STATE RATE	COMMUNITY ESTIMATE	STATE ESTIMATE
Total population all ages		5,496	1,056,611
Median age of females		53.7	41.6
Median age of males		50.0	38.1
Population 60 years or older as % of total population		33.5%	23.0%
Total population 60 years or older		1,839	243,523
Population 65 years or older as % of total population		23.9%	16.5%
Total population 65 years or older		1,314	174,210
% 65-74 years		62.1%	55.6%
% 75-84 years		29.7%	28.9%
% 85 years or older	*	8.2%	15.5%
% 65+ population who are female		59.0%	57.2%
% 85+ population who are female		62.0%	69.7%
Race and ethnicity of the population 65+			
% White		96.7%	92.0%
% African American		1.1%	3.2%
% Asian		2.3%	1.6%

Couple, homeowner without mortgage, good health	1.05	\$35,700.00	\$33,984.00
Couple, renter, good health	1.05	\$37,764.00	\$36,060.00

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org>) for more information on data sources, measures, and methodology. For most indicators the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.
