

Burrillville (Providence)

Burrillville is a town in Providence County with 2,391 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of anemia, benign prostatic hyperplasia, cataract, glaucoma, osteoarthritis/rheumatoid arthritis, osteoporosis, prostate cancer, hearing impairment, and self-care difficulties. They reported receiving adequate emotional support. However, they had higher rates of COPD, CHF, hypertension, ischemic heart disease, and anxiety disorder. They are more likely to take the health promotion steps of getting cholesterol screenings and less likely to get the shingles vaccine and meet the CDC preventive health screening goals. Community resources to support healthy aging include 8 primary care providers and 3 nursing homes within 5 miles; 17 home health agencies, 3 nursing homes, a community health center, and 2 public libraries.

POPULATION CHARACTERISTICS	Significantly different than STATE RATE	COMMUNITY ESTIMATE	STATE ESTIMATE
Total population all ages		16,453	1,056,611
Median age of females		44.7	41.6
Median age of males		42.8	38.1

Couple, homeowner without mortgage, good health	0.99	\$33,612.00	\$33,984.00
Couple, renter, good health	0.99	\$35,844.00	\$36,060.00

TECHNICAL NOTES

*See our technical report (online at <https://healthyagingdatareports.org>) for more information on data sources, measures, and methodology. For most indicators the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.

Data Sources:

- Population Characteristics: The U.S. Census Bureau (American Community Survey 2014-2018).
