

Charlestown (Washington)

Charlestown is a town in Washington County with 1,733 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of hip fractures, tooth loss, obesity, high cholesterol, anemia, chronic kidney disease, CHF, diabetes, heart attack, ischemic heart disease, migraine, osteoporosis, peripheral vascular disease, depression, anxiety disorder, schizophrenia, and ambulatory difficulties. However, they had a higher rate of cataract. They reported receiving adequate emotional support and being satisfied with life. They are more likely to take the health promotion steps of having dental insurance and an annual dental exam, doing physical activity, meeting the CDC guidelines for muscle-strengthening and aerobic physical activity, getting a colorectal cancer screening. Community resources include a primary care provider within 5 miles, 11 home health agencies, 7 hospice agencies, a senior center, a public library, and a YMCA.

POPULATION CHARACTERISTICS	Significantly different than STATE RATE	COMMUNITY ESTIMATE	STATE ESTIMATE
Total population all ages		7,780	1,056,611
Median age of females		50.5	41.6
Median age of males		46.2	38.1
Population 60 years or older as % of total population		31.3%	23.0%
Total population 60 years or older		2,432	243,523
Population 65 years or older as % of total population		22.3%	16.5%
Total population 65 years or older		1,733	174,210
% 65-74 years	*	68.4%	55.6%
% 75-84 years		25.0%	28.9%

% 65+ moved within same county in last year	*	0.0%	3.6%
% 65+ moved from different county in last year		0.6%	1.0%
% 65+ moved from different state in last year		1.0%	1.1%
# of assisted living sites		0	62
% of vacant homes in community	*	38.1%	12.1%
ECONOMIC			
% 60+ receiving food benefits in last year		5.2%	15.0%
% 65+ employed in last year		22.9%	21.9%
% 65+ with income below the poverty line in last year		5.1%	9.5%
Median household income		\$79,019.00	\$63,296.00
% 65+ households with annual income < \$20,000	*	8.4%	24.3%
% 65+ households with annual income \$20,000-\$49,999		30.1%	32.2%
% 65+ households with annual income \$50,000-\$99,999	*	35.7%	24.8%
% 65+ households with annual income \$100,000+		25.8%	18.7%
COST OF LIVING			
	RATIO OF COUNTY TO STATE	\$ COUNTY ESTIMATE	\$ STATE ESTIMATE
Elder Index			
Single, homeowner without mortgage, good health	1.00	\$23,424.00	\$23,484.00
Single, renter, good health	0.99	\$25,332.00	\$25,560.00
Couple, homeowner without mortgage, good health	1.00	\$33,852.00	\$33,984.00
Couple, renter, good health	0.99	\$35,760.00	\$36,060.00

TECHNICAL NOTES

*See our technical report (online at <https://healthyagingdatareports.org>) for more information on data sources, measures, and methodology. For most indicators the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an *. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.
