

## Litchfield (Litchfield)

Litchfield is a town in Litchfield County with 2,293 residents age 65 or older. Compared to state average rates, older residents fared better on some healthy aging indicators with lower rates of high cholesterol, Alzheimer's disease or related dementias, anemia, asthma, chronic kidney disease, congestive heart failure, diabetes, fibromyalgia/chronic pain/fatigue, hypertension, hypothyroidism, lung cancer, osteoporosis, peripheral vascular disease, depression, schizophrenia and other psychotic disorders, and personality disorder. Community resources to support healthy aging include a caregiver support group, 10 primary care providers within 5 miles, 10 home health agencies, 7 hospice agencies, 2 public libraries, and an assisted living site.

<b>POPULATION CHARACTERISTICS</b>	<b>Significantly different than STATE RATE</b>	<b>COMMUNITY ESTIMATE</b>	<b>STATE ESTIMATE</b>
Total population all ages		8,198	3,581,504
Population 60 years or older as % of total population		36.9%	23.0%
Total population 60 years or older		3,028	823,529
Population 65 years or older as % of total population		28.0%	16.4%
Total population 65 years or older		2,293	587,580
% 65-74 years		50.8%	55.7%
% 75-84 years		31.5%	29.1%
% 85 years or older		17.7%	15.2%

Couple, homeowner without mortgage, good health	0.98	\$37,236.00	\$37,920.00
Couple, renter, good health	0.95	\$37,860.00	\$39,660.00

#### TECHNICAL NOTES

\*See our technical report (online at <https://healthyagingdatareports.org>) for more information on data sources, measures, geographic units, margins of error, and statistical methodology. For most indicators the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. "Better" is used where a higher/lower value has positive implications for the health of older residents. "Worse" is used where a higher/lower score has negative implications for the health of older people, and when the implication is unclear, we use an \*.

We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed we used a hierarchical approach to reporting.
