

Orange (New Haven)

Orange is a town in New Haven County with 3,172 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of tobacco use disorder, PTSD, and schizophrenia. However, they have higher rates of anemia, benign prostatic hyperplasia, congestive heart failure (CHF), diabetes, high cholesterol, hypertension, osteoarthritis/rheumatoid arthritis, and osteoporosis. Older residents in New Haven County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (76.1%) and annual dental exams (70.4%), while 52% of men and 37.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include two assisted living facilities, 33 primary care providers, one home health agency, one skilled nursing facility, one hospice agency, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		14,231	3,611,317

% 65+ hospice users	*	3.4%	2.6%
% 65+ hospice users as % of decedents	*	52.3%	42.4%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
