

Plainville (Hartford)

Plainville is a town in Hartford County with 3,414 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of glaucoma, migraine, and osteoporosis. However, they have higher rates of chronic kidney disease, chronic obstructive pulmonary disease (COPD), hypertension, and tobacco use disorder. Older residents in Hartford County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.9%) and annual dental exams (69.2%), while 46.5% of men and 47.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one assisted living facility, 11 primary care providers, one skilled nursing facility, one Alzheimer’s caregiver support group, two community health centers, two adult day health centers, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		17,505	3,611,317
Population 60 years or older as % of total population		26.1%	24.5%
Total population 60 years and older		4,565	885,046
Population 65 years or older as % of total population		19.5%	17.4%
Total population 65 years and older		3,414	629,108
% 65-74 years		54.5%	57.6%
% 75-84 years		28.5%	28.4%
% 85 years or older		17.0%	14.0%

% 65+ hospice users		2.4%	2.6%
% 65+ hospice users as % of decedents		45.7%	42.4%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
