

Rocky Hill (Hartford)

Rocky Hill is a town in Hartford County with 4,414 residents aged 65 and older. Compared to state average rates, older residents have a lower rate of peripheral vascular disease. However, they have higher rates of Alzheimer's disease or related dementias, cataract, chronic kidney disease, hypertension, depression, anxiety disorder, PTSD, and schizophrenia. Older residents in Hartford County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.9%) and annual dental exams (69.2%), while 46.5% of men and 47.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three assisted living facilities, 24 primary care providers, six home health agencies, four skilled nursing facilities, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		20,705	3,611,317
Population 60 years or older as % of total population		28.8%	24.5%
Total population 60 years and older		5,972	885,046
Population 65 years or older as % of total population		21.3%	17.4%
Total population 65 years and older		4,414	629,108
% 65-74 years	*	48.9%	57.6%
% 75-84 years	*	22.8%	28.4%
% 85 years or older	*	28.2%	14.0%
% 65+ population who are female		59.9%	55.7%
% 85+ population who are female		69.1%	66.0%
Race and ethnicity of the population 65+			
% White		86.0%	84.8%
% African American	*	3.1%	6.7%
% Asian		4.1%	2.6%
% Other race(s)		6.7%	5.9%
% Hispanic	*	3.5%	6.7%
# 55+ who are Native American / Alaskan		0	1,729

CAREGIVING			
# of Alzheimer's support groups		0	29
% grandparents raising grandchildren		0.26%	0.73%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
