

Somers (Tolland)

Somers is a town in Tolland County with 1,909 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, benign prostatic hyperplasia, diabetes, peripheral vascular disease, pressure ulcer, depression, and schizophrenia. However, they have a higher rate of glaucoma. Older residents in Tolland County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.3%) and annual dental exams (72.6%), while 50.2% of men and 45.8% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three primary care providers, one senior center, one public university or community college, an Alzheimer's disease support group, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		10,086	3,611,317
Population 60 years or older as % of total population		27.1%	24.5%
Total population 60 years and older		2,738	885,046
Population 65 years or older as % of total population		18.9%	17.4%
Total population 65 years and older		1,909	629,108
% 65-74 years	*	67.0%	57.6%
% 75-84 years		25.7%	28.4%
% 85 years or older	*	7.3%	14.0%

% 65+ hospice users		2.5%	2.6%
% 65+ hospice users as % of decedents		41.9%	42.4%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
