

Bozrah (New London)

Bozrah is a town in New London County with 420 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of glaucoma and schizophrenia. However, they have higher rates of anemia, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), high cholesterol, endometrial cancer, hypertension, osteoarthritis/rheumatoid arthritis, and tobacco use disorder. Older residents in New London County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78%) and annual dental exams (72.6%), while 56.1% of men and 41.6% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include two assisted living facilities.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,410	3,611,317
Population 60 years or older as % of total population		28.3%	24.5%
Total population 60 years and older		683	885,046
Population 65 years or older as % of total population		17.4%	17.4%
Total population 65 years and older		420	629,108
% 65-74 years		59.8%	57.6%
% 75-84 years		31.0%	28.4%
% 85 years or older		9.3%	14.0%
% 65+ population who are female		46.9%	55.7%

% 65+ hospice users		3.0%	2.6%
% 65+ hospice users as % of decedents		48.5%	42.4%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
