

Thompson (Windham)

Thompson is a town in Windham County with 1,785 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, anemia, and glaucoma. However, they have a higher rate of chronic obstructive pulmonary disease (COPD). Older residents in Windham County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.4%) and annual dental exams (68.8%), while 48.6% of men and 44% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include two primary care providers, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		9,254	3,611,317
Population 60 years or older as % of total population		30.0%	24.5%
Total population 60 years and older		2,775	885,046
Population 65 years or older as % of total population		19.3%	17.4%
Total population 65 years and older		1,785	629,108
% 65-74 years	*	74.7%	57.6%
% 75-84 years	*	11.5%	28.4%
% 85 years or older		13.8%	14.0%
% 65+ population who are female		50.5%	55.7%
% 85+ population who are female	*	36.6%	66.0%
Race and ethnicity of the population 65+			
% White	*	97.2%	84.8%
% African American	*	0.0%	6.7%
% Asian		0.0%	2.6%

CAREGIVING			
# of Alzheimer's support groups		0	29
% grandparents raising grandchildren		0.95%	0.73%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
