

A2 Bridgeport (Fairfield)

Bridgeport Area 2 is a Southern neighborhood of Bridgeport in Fairfield County with 7,170 residents aged 65 and older. Compared to state average rates, older residents have lower rates of atrial fibrillation, high cholesterol, breast cancer, cataract, osteoarthritis/rheumatoid arthritis, and prostate cancer. However, they have higher rates of Alzheimer's disease, anemia, chronic kidney disease, CHF, diabetes, peripheral vascular disease, pressure ulcer, substance and tobacco use disorders, and schizophrenia. Older residents in Fairfield County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (73.6%) and annual dental exams (72.4%), while 49.5% of men and 44.9% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources include three assisted living facilities, one Alzheimer's disease support group, 16 primary care providers, a home health agency, a hospice agency, 16 community health centers, three adult day health centers, three senior centers, two public universities or community colleges, and two public libraries.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		60,204	3,611,317
Population 60 years or older as % of total population		18.9%	24.5%
Total population 60 years and older		11,392	885,046
Population 65 years or older as % of total population		11.9%	17.4%
Total population 65 years and older		7,170	629,108
% 65-74 years		66.5%	57.6%
% 75-84 years		20.3%	28.4%
% 85 years or older		13.2%	14.0%
% 65+ population who are female		52.3%	55.7%
% 85+ population who are female		66.9%	66.0%
Race and ethnicity of the population 65+			
% White		67.5%	84.8%
% African American		14.2%	6.7%
% Asian		4.2%	2.6%
% Other race(s)		14.1%	5.9%

% 65+ hospice users as % of decedents	*	32.2%	42.4%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
