

### A3 Hartford (Hartford)

Hartford Area 3 is a Southern neighborhood of Hartford in Hartford County with 11,780 residents aged 65 and older. Compared to state average rates, older residents have lower rates of atrial fibrillation, benign prostatic hyperplasia, high cholesterol, cataract, migraine, and osteoarthritis/rheumatoid arthritis. However, they have higher rates of Alzheimer's disease, asthma, chronic kidney disease, congestive heart failure (CHF), diabetes, heart attack, hypertension, liver disease, pressure ulcer, substance and tobacco use disorders, depression, anxiety disorder, PTSD, and schizophrenia. Older residents in Hartford County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.9%) and annual dental exams (69.2%), while 46.5% of men and 47.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources include four assisted living facilities, 362 primary care providers, two hospitals, two home health agencies, two skilled nursing facilities, 15 community health centers, four senior centers, and three public libraries.

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
