

A1 New Haven (New Haven)

New Haven Area 1 is a Western neighborhood of New Haven in New Haven County with 5,291 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of atrial fibrillation and prostate cancer. However, they have higher rates of chronic kidney disease, congestive heart failure (CHF), diabetes, heart attack, substance use disorder, and depression. Older residents in New Haven County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (76.1%) and annual dental exams (70.4%), while 52% of men and 37.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include two primary care providers, four community health centers, one adult day health center, one public university or community college, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		37,966	3,611,317
Population 60 years or older as % of total population		20.2%	24.5%
Total population 60 years and older		7,682	885,046
Population 65 years or older as % of total population		13.9%	17.4%
Total population 65 years and older		5,291	629,108
% 65-74 years		61.0%	57.6%
% 75-84 years		23.8%	28.4%
% 85 years or older		15.3%	14.0%
% 65+ population who are female		53.0%	55.7%
% 85+ population who are female		55.4%	66.0%
Race and ethnicity of the population 65+			
% White	*	74.2%	84.8%
% African American	*	18.7%	6.7%
% Asian		3.8%	2.6%
% Other race(s)		3.2%	5.9%
% Hispanic		6.6%	6.7%
# 55+ who are Native American / Alaskan		9	1,729
Marital status of the population 65+			
% married		59.3%	54.5%
% divorced/separated		13.2%	16.1%
% widowed		20.8%	21.2%
% never married		6.7%	8.2%
Education of the population 65+			
% with less than high school education		7.4%	11.9%
% with high school or some college	*	35.9%	52.4%
% with college degree		17.4%	17.0%
% with graduate or professional degree	*	39.4%	18.6%
% 65+ population who speak only English at home		83.4%	84.4%
% 65+ population who are veterans of military service		11.2%	13.4%

POPULATION CHARACTERISTICS

% 65+ hospice users		2.2%	2.6%
% 65+ hospice users as % of decedents		39.2%	42.4%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
