

Hartland (Hartford)

Hartland is a town in Hartford County with 354 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of anemia, asthma, benign prostatic hyperplasia, cataract, diabetes, fibromyalgia/chronic pain/fatigue, ischemic heart disease, osteoporosis, peripheral vascular disease, and schizophrenia. Older residents in Hartford County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.9%) and annual dental exams (69.2%), while 46.5% of men and 47.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,806	3,611,317
Population 60 years or older as % of total population		34.3%	24.5%
Total population 60 years and older		620	885,046
Population 65 years or older as % of total population		19.6%	17.4%
Total population 65 years and older		354	629,108
% 65-74 years	*	67.2%	57.6%
% 75-84 years		19.5%	28.4%
% 85 years or older		13.3%	14.0%
% 65+ population who are female		53.4%	55.7%
% 85+ population who are female		74.5%	66.0%
Race and ethnicity of the population 65+			
% White	*	96.0%	84.8%
% African American		0.8%	6.7%
% Asian		0.0%	2.6%

% 65+ with self-reported self-care difficulty		8.8%	6.9%
% 65+ with self-reported independent living difficulty		16.4%	12.7%
CAREGIVING			
# of Alzheimer's support groups		0	29
% grandparents raising grandchildren		0.00%	0.73%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
