

Madison (New Haven)

Madison is a town in New Haven County with 4,248 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, asthma, chronic kidney disease, chronic obstructive pulmonary disease (COPD), colon cancer, congestive heart failure (CHF), diabetes, heart attack, ischemic heart disease, peripheral vascular disease, pressure ulcer, substance use disorder, and schizophrenia. However, they have higher rates of osteoarthritis/rheumatoid arthritis and prostate cancer. Older residents in New Haven County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (76.1%) and annual dental exams (70.4%), while 52% of men and 37.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 12 primary care providers, one skilled nursing facility, one Alzheimer's caregiver support group, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		17,658	3,611,317
Population 60 years or older as % of total population		33.3%	24.5%
Total population 60 years and older		5,880	885,046
Population 65 years or older as % of total population		24.1%	17.4%
Total population 65 years and older		4,248	629,108
% 65-74 years	*	65.7%	57.6%
% 75-84 years	*	21.8%	28.4%
% 85 years or older		12.5%	14.0%
% 65+ population who are female		49.6%	55.7%
% 85+ population who are female		55.2%	66.0%
Race and ethnicity of the population 65+			
% White	*	95.2%	84.8%
% African American	*	0.1%	6.7%
% Asian		3.0%	2.6%

# of Alzheimer's support groups		1	29
% grandparents raising grandchildren	*	0.00%	0.73%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
