

## Middlebury (New Haven)

Middlebury is a town in New Haven County with 1,732 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of breast cancer, chronic obstructive pulmonary disease (COPD), substance and tobacco use disorders, depression, anxiety disorder, and schizophrenia. However, they have higher rates of glaucoma, heart attack, and osteoarthritis/rheumatoid arthritis. Older residents in New Haven County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (76.1%) and annual dental exams (70.4%), while 52% of men and 37.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include ten primary care providers, one skilled nursing facility, two hospice agencies, one senior center, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		7,665	3,611,317
Population 60 years or older as % of total population		30.0%	24.5%
Total population 60 years and older		2,299	885,046
Population 65 years or older as % of total population		22.6%	17.4%
Total population 65 years and older		1,732	629,108
% 65-74 years		64.7%	57.6%
% 75-84 years	*	21.7%	28.4%
% 85 years or older		13.6%	14.0%
% 65+ population who are female		57.6%	55.7%
% 85+ population who are female	*	45.8%	66.0%
Race and ethnicity of the population 65+			
% White	*	95.5%	84.8%
% African American	*	0.0%	6.7%
% Asian		4.0%	2.6%
% Other race(s)		0.5%	5.9%
% Hispanic	*	0.5%	6.7%
# 55+ who are Native American / Alaskan		0	1,729
Marital status of the population 65+			
% married	*	62.5%	54.5%
% divorced/separated		18.0%	16.1%
% widowed		17.1%	21.2%
% never married	*	2.4%	8.2%
Education of the population 65+			
% with less than high school education	*	2.5%	11.9%

% 65+ with schizophrenia & other psychotic disorder	B	2.6%	4.2%
<b>LIVING WITH DISABILITY</b>			
% 65+ with self-reported hearing difficulty		15.3%	11.4%
% 65+ with self-reported vision difficulty		1.8%	4.8%
% 65+ with self-reported cognition difficulty		6.1%	7.2%
% 65+ with self-reported ambulatory difficulty		13.3%	17.8%
% 65+ with self-reported self-care difficulty		7.3%	6.9%
% 65+ with self-reported independent living difficulty		8.9%	12.7%
<b>CAREGIVING</b>			
# of Alzheimer's support groups		0	29
% grandparents raising grandchildren		0.43%	0.73%

## HEALTH OUTCOMES

	Significantly different than state rate	Community estimate	State estimate
<b>ACCESS TO CARE</b>			
% 65+ dually eligible for Medicare and Medicaid	*	15.6%	22.5%
% 65+ Medicare managed care enrollees	*	44.4%	50.1%
% 18-64 who lack health insurance (County)		8.3%	NA
# of primary care providers		10	4,547
# of hospitals		0	36
# of home health agencies		0	80
# of skilled nursing facilities		1	202
# of hospice agencies		2	27
# of community health centers		0	388
# of adult day health centers		0	38
<b>SERVICE UTILIZATION</b>			
# physician visits per year	*	9.1	8.4
# emergency room visits/1000 persons 65+ years annually	*	406.7	586.6
# Part D monthly prescription fills per person annually		50.8	52.1
# home health visits annually		2.9	3.1
# durable medical equipment claims annually		2.1	2.0
# inpatient hospital stays/1000 persons 65+ years annually	*	187.0	241.8
% Medicare inpatient hospital readmissions (as % of admissions)		13.0%	17.6%
# skilled nursing facility stays/1000 persons 65+ years annually	*	65.3	89.9
# skilled nursing home Medicare beds/1000 persons 65+ years		32.1	37.1
% 65+ getting Medicaid long term services and supports		4.0%	4.4%
% 65+ hospice users		2.8%	2.6%
% 65+ hospice users as % of decedents		50.5%	42.4%

## NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](http://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
