

Norfolk (Litchfield)

Norfolk is a town in Litchfield County with 430 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of hip fracture, anemia, asthma, chronic kidney disease, high cholesterol, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, fibromyalgia/chronic pain/fatigue, hypertension, osteoporosis, peripheral vascular disease, pressure ulcer, stroke, and anxiety disorder. However, they have a higher rate of PTSD. Older residents in Litchfield County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (75.9%) and annual dental exams (72.1%), while 48% of men and 39.3% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,856	3,611,317
Population 60 years or older as % of total population		34.1%	24.5%
Total population 60 years and older		633	885,046
Population 65 years or older as % of total population		23.2%	17.4%
Total population 65 years and older		430	629,108
% 65-74 years		69.8%	57.6%
% 75-84 years		25.8%	28.4%
% 85 years or older	*	4.4%	14.0%
% 65+ population who are female		53.0%	55.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Connecticut Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
