

Dennysville, East Central Washington, East Machias (Washington)

The communities of Dennysville, East Central Washington, and East Machias are located in Washington County. Collectively, these areas are home to 367 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of high cholesterol, benign prostatic hyperplasia, chronic kidney disease, chronic obstructive pulmonary disease (COPD), diabetes, fibromyalgia/chronic pain/fatigue, hypertension, migraine, osteoarthritis/rheumatoid arthritis, stroke, substance and tobacco use disorders, depression, and anxiety disorder. However, they have a higher rate of colon cancer. Older residents in Washington County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (80%) and annual dental exams (57.5%), while 51.6% of men and 42.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one community health center and two public libraries.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,159	1,366,949
Population 60 years or older as % of total population		26.5%	29.4%
Total population 60 years and older		572	402,170
Population 65 years or older as % of total population		17.0%	21.5%
Total population 65 years and older		367	293,488
% 65-74 years		56.4%	59.9%
% 75-84 years		31.3%	28.5%
% 85 years or older		12.3%	11.6%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
