Dexter (Penobscot)

Dexter is a town in Penobscot County with 810 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of glaucoma and osteoporosis. However, they have higher rates of anemia, chronic kidney disease, heart attack, hypertension, lung cancer, and PTSD. Older residents in Penobscot County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.3%) and annual dental exams (58.3%), while 47.7% of men and 40.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one primary care provider, one skilled nursing facility, one community health center, and one public library. Dexter is a designated AARP Age-Friendly Community.

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (<u>healthyagingdatareports.org</u>). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are <u>not</u> due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
