

East Millinocket, Medway, Millinocket, Mount Chase, North Penobscot, Patten, Stacyville (Penobscot)

The communities of East Millinocket, Medway, Millinocket, Mount Chase, North Penobscot, Patten, and Stacyville are located in Penobscot County. Collectively, these areas are home to 2,723 residents aged 65 and older. Compared to state average rates, they have lower rates of fibromyalgia, migraine, and substance use disorder. However, they have higher rates of high cholesterol, anemia, atrial fibrillation, breast cancer, cataract, chronic kidney disease, COPD, CHF, diabetes, heart attack, hypertension, ischemic heart disease, lung cancer, peripheral vascular disease, and PTSD. Residents in the county varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.3%) and annual dental exams (58.3%), while 47.7% of men and 40.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources include 12 primary care providers, a hospital, a skilled nursing facility, 7 community health centers, 2 public universities or community colleges, and 3 public libraries. Millinocket is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
