

Edinburg, Howland, Maxfield, Penobscot Indian Island Reservation, Seboeis (Penobscot)

The communities of Edinburg, Howland, Maxfield, Penobscot Indian Island Reservation, and Seboeis are located in Penobscot County. Collectively, these areas are home to 461 residents aged 65 and older. Compared to state average rates, older residents fare worse on some healthy aging indicators with higher rates of high cholesterol, anemia, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, glaucoma, heart attack, hypertension, lung cancer, peripheral vascular disease, tobacco use disorder, and PTSD. Older residents in Penobscot County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.3%) and annual dental exams (58.3%), while 47.7% of men and 40.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their skilled nursing facility.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,066	1,366,949
Population 60 years or older as % of total population		29.7%	29.4%
Total population 60 years and older		614	402,170
Population 65 years or older as % of total population		22.3%	21.5%
Total population 65 years and older		461	293,488
% 65-74 years		54.0%	59.9%
% 75-84 years		27.5%	28.5%
% 85 years or older		18.4%	11.6%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
