

Gorham (Cumberland)

Gorham is a town in Cumberland County with 2,694 residents aged 65 and older. Compared to state average rates, older residents have a lower rate of colon cancer. However, they have a higher rate of peripheral vascular disease. Older residents in Cumberland County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.5%) and annual dental exams (73.2%), while 54.5% of men and 43.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 14 primary care providers, one skilled nursing facility, two public libraries, and an assisted living facility.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		17,999	1,366,949

% 65+ hospice users		3.5%	3.0%
% 65+ hospice users as % of decedents	*	61.7%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
