

Harrington, Milbridge (Washington)

The communities of Harrington and Milbridge are located in Washington County. Collectively, these areas are home to 625 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of fibromyalgia/chronic pain/fatigue, liver disease, migraine, osteoarthritis/rheumatoid arthritis, substance use disorder, and depression. However, they have higher rates of colon cancer and glaucoma. Older residents in Washington County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (80%) and annual dental exams (57.5%), while 51.6% of men and 42.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three primary care providers, one skilled nursing facility, two community health centers, and two public libraries.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,214	1,366,949
Population 60 years or older as % of total population		34.6%	29.4%
Total population 60 years and older		766	402,170
Population 65 years or older as % of total population		28.2%	21.5%
Total population 65 years and older		625	293,488
% 65-74 years		58.6%	59.9%
% 75-84 years		25.9%	28.5%
% 85 years or older		15.5%	11.6%
% 65+ population who are female		48.8%	54.3%
% 85+ population who are female		79.4%	64.8%
Race and ethnicity of the population 65+			
% White		97.1%	96.6%
% African American		0.6%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		2.2%	2.5%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
