

Hodgdon, Houlton, Littleton (Aroostook)

The communities of Hodgdon, Houlton, and Littleton are located in Aroostook County. Collectively, these areas have 1,803 residents aged 65+. Compared to state average rates, older residents have a lower rate of substance use disorder and higher rates of hip fracture, high cholesterol, Alzheimer's disease, anemia, benign prostatic hyperplasia, chronic kidney disease, COPD, colon cancer, CHF, diabetes, glaucoma, hypertension, ischemic heart disease, arthritis, osteoporosis, peripheral vascular disease, pressure ulcer, tobacco use disorder, depression, anxiety disorder, and schizophrenia. Residents in the county varied in obtaining preventive health screenings: residents 18+ got annual physical exams (81.1%) and annual dental exams (59.8%), while 43.1% of men and 36% of women 65+ completed all CDC recommended vaccinations and cancer screenings. Community resources include 15 PCPs, a hospital, a home health agency, a skilled nursing facility, a community health center, an adult day health center, a senior center, 3 public universities or community colleges, and 1 public library. Houlton is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate

% 65+ hospice users as % of decedents	*	30.0%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
