

Kenduskeag, Levant (Penobscot)

The communities of Kenduskeag and Levant are located in Penobscot County. Collectively, these areas are home to 767 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias and cataract. However, they have higher rates of diabetes, lung cancer, and PTSD. Older residents in Penobscot County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.3%) and annual dental exams (58.3%), while 47.7% of men and 40.7% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		4,335	1,366,949
Population 60 years or older as % of total population		23.9%	29.4%
Total population 60 years and older		1,036	402,170
Population 65 years or older as % of total population		17.7%	21.5%
Total population 65 years and older		767	293,488
% 65-74 years		59.2%	59.9%
% 75-84 years		36.2%	28.5%
% 85 years or older	*	4.6%	11.6%

% 65+ hospice users	3.9%	3.0%
% 65+ hospice users as % of decedents	54.0%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
