

Lubec (Washington)

Lubec is a town in Washington County with 560 residents aged 65 and older. Compared to state average rates, older residents have a lower rate of diabetes. However, they have higher rates of anemia, chronic obstructive pulmonary disease (COPD), and colon cancer. Older residents in Washington County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (80%) and annual dental exams (57.5%), while 51.6% of men and 42.1% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include one home health agency, two community health centers, and one public library.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,218	1,366,949
Population 60 years or older as % of total population		56.6%	29.4%
Total population 60 years and older		689	402,170
Population 65 years or older as % of total population		46.0%	21.5%
Total population 65 years and older		560	293,488
% 65-74 years		59.3%	59.9%
% 75-84 years		32.0%	28.5%
% 85 years or older		8.7%	11.6%
% 65+ population who are female		50.0%	54.3%
% 85+ population who are female	*	36.7%	64.8%
Race and ethnicity of the population 65+			
% White		97.7%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		2.3%	2.5%
% Hispanic		0.0%	0.7%
# 55+ who are Native American / Alaskan		19	1,794
Marital status of the population 65+			
% married		60.9%	57.0%
% divorced/separated		15.5%	16.9%
% widowed		15.2%	20.6%

% 65+ hospice users	*	1.3%	3.0%
% 65+ hospice users as % of decedents	*	21.2%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
