

## Mexico (Oxford)

Mexico is a town in Oxford County with 630 residents aged 65 and older. Compared to state average rates, older residents fare worse on some healthy aging indicators with higher rates of chronic obstructive pulmonary disease (COPD), diabetes, heart attack, peripheral vascular disease, stroke, and substance and tobacco use disorders. Older residents in Oxford County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (76.5%) and annual dental exams (57.6%), while 43.2% of men and 38.8% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. A community resource to support healthy aging is their public library.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		2,758	1,366,949
Population 60 years or older as % of total population		38.7%	29.4%
Total population 60 years and older		1,067	402,170
Population 65 years or older as % of total population		22.8%	21.5%
Total population 65 years and older		630	293,488
% 65-74 years		66.5%	59.9%
% 75-84 years		20.0%	28.5%
% 85 years or older		13.5%	11.6%
% 65+ population who are female		59.5%	54.3%
% 85+ population who are female		62.4%	64.8%
Race and ethnicity of the population 65+			
% White		98.7%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		1.3%	2.5%
% Hispanic		0.0%	0.7%
# 55+ who are Native American / Alaskan		0	1,794
Marital status of the population 65+			
% married		54.9%	57.0%
% divorced/separated		27.8%	16.9%
% widowed		17.3%	20.6%
% never married	*	0.0%	5.6%
Education of the population 65+			
% with less than high school education		8.9%	7.6%
% with high school or some college	*	81.4%	59.0%

% 65+ getting Medicaid long term services and supports		1.7%	2.1%
% 65+ hospice users		3.5%	3.0%
% 65+ hospice users as % of decedents		48.5%	49.7%

NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
