

Norway (Oxford)

Norway is a town in Oxford County with 1,225 residents aged 65 and older. Compared to state average rates, older residents have a lower rate of benign prostatic hyperplasia. However, they have higher rates of cataract, hypertension, and osteoarthritis/rheumatoid arthritis. Older residents in Oxford County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (76.5%) and annual dental exams (57.6%), while 43.2% of men and 38.8% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 18 primary care providers, one hospital, one skilled nursing facility, one public library, and one Alzheimer's disease support group.

POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		5,113	1,366,949
Population 60 years or older as % of total population		35.7%	29.4%
Total population 60 years and older		1,827	402,170
Population 65 years or older as % of total population		24.0%	21.5%
Total population 65 years and older		1,225	293,488
% 65-74 years		65.8%	59.9%
% 75-84 years		26.3%	28.5%
% 85 years or older		7.9%	11.6%
% 65+ population who are female		56.7%	54.3%
% 85+ population who are female		27.8%	64.8%
Race and ethnicity of the population 65+			
% White		98.5%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		1.5%	2.5%
% Hispanic		0.0%	0.7%
# 55+ who are Native American / Alaskan		0	1,794

% 65+ hospice users as % of decedents		56.0%	49.7%

NOTES

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at (healthyagingdatareports.org). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
