

## Penobscot (Hancock)

Penobscot is a town in Hancock County with 370 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of peripheral vascular disease and schizophrenia. However, they have a higher rate of cataract. Older residents in Hancock County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (78.4%) and annual dental exams (68.8%), while 49.7% of men and 42.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Penobscot is a designated AARP Age-Friendly Community.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		1,091	1,366,949
Population 60 years or older as % of total population		41.8%	29.4%
Total population 60 years and older		456	402,170
Population 65 years or older as % of total population		33.9%	21.5%
Total population 65 years and older		370	293,488
% 65-74 years		68.9%	59.9%
% 75-84 years		22.4%	28.5%
% 85 years or older		8.6%	11.6%
% 65+ population who are female		53.2%	54.3%
% 85+ population who are female		71.9%	64.8%
Race and ethnicity of the population 65+			
% White		99.2%	96.6%
% African American		0.0%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		0.8%	2.5%

NOTES

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
