

## Augusta (Kennebec)

Augusta is a city in Kennebec County with 4,228 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of benign prostatic hyperplasia and glaucoma. However, they have higher rates of hip fracture, Alzheimer's disease or related dementias, anemia, chronic obstructive pulmonary disease (COPD), congestive heart failure (CHF), diabetes, ischemic heart disease, migraine, peripheral vascular disease, pressure ulcer, tobacco use disorder, depression, and schizophrenia. Older residents in Kennebec County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.7%) and annual dental exams (67.3%), while 53.7% of men and 41% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include 146 primary care providers, two hospitals, four skilled nursing facilities, one community health center, one adult day health center, one public university or community college, and a public library. Augusta is a designated AARP Age-Friendly Community.

### POPULATION CHARACTERISTICS

	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		18,938	1,366,949
Population 60 years or older as % of total population		28.4%	29.4%
Total population 60 years and older		5,378	402,170
Population 65 years or older as % of total population		22.3%	21.5%
Total population 65 years and older		4,228	293,488
% 65-74 years	*	47.8%	59.9%
% 75-84 years	*	38.9%	28.5%
% 85 years or older		13.4%	11.6%
% 65+ population who are female		58.8%	54.3%
% 85+ population who are female		70.1%	64.8%
Race and ethnicity of the population 65+			
% White		97.6%	96.6%
% African American		0.1%	0.3%
% Asian		0.0%	0.5%
% Other race(s)		2.3%	2.5%
% Hispanic		1.2%	0.7%
# 55+ who are Native American / Alaskan		41	1,794

NOTES

## TECHNICAL NOTES

\*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyagingdatareports.org](https://healthyagingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms “Better” and “Worse” to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.
